WHO YO

YOU'VE GEEN THERE, LIVED THAT, AND LEARNED FROM IT So why would you let something like erectile dysfunction (RD) get in your way?

If you're the matters of men who have some degree of ED, talk to your doctor about VIAGRA HIS America's most prescribed ED treatment.

We know that no medicine is for everyone. Don't take VIAGRA if you take nitrates, often prescribed for chest pain, as this may cause a sudden unsefe drop in blood pressure. Talk with your doctor first. Make sure your heart is healthy enough to have sex. If you have chest pele, neusee, or other discomforts during sex, seek medical help right away.

In the rare event of en eraction leating more than four hours, seek immediate medical help to avoid long-term injury. In one sistences, men who take PDES inhibitors (ore) erectile dysfunction medicines, including VIAGRAS reported a sudden decreese or loss of vision, or sudden decreese or loss of hearing. It is not possible to determine whether these events are existed directly to these medicants or to other feature. If you experience erry of these symptoms, stop taking POES inhibitors, including VIA/QNA, and call endotor right away. The most common side effects of VIAGRA are headening, facial flushing, and upset atomach. Less common

THE ORLY THING FOR CERTAIN ABOUT 2011 WAS GIADS.

BY STEPHEN MARCHE

was a shitstorm, sometimes literally some-2011 was functionable to the state of the sound of th

gerous and confusing. The world's inner unpredicts
ability, the chaotic messiness of the whole business,
shuddered to the surface and ruined the luxury of calm and order. This
year things simply refused to do what we expected. We zipped from
one crists to another, without time to grasp or to digest or to consider.

The ground gave out beneath our feet intellectually as well as physically. A tsunami demolished not only the coast of Japan but also the well-laid plans of most industrial countries for generating

WOODFORD RESERVET (RAFT BOURBON

sustainable power in the future. The omens were garishly over-thetop: One day an earthquake cracks the facade of the National Cathedral in Washington and the next Hurricane Irene threatens to rip parts down. The Arab world, without prompting, without any warning from Middle East experts, without much of a reason at all, decided that the tyranny under which it had been living for half a century had to end. And now, Immediately, When the system collapsed, it fell apart like Michael Jackson's face, not bit by bit but all at once.

The situation in America was equally fraught with turmoil and impending chaos: Washington's decades of decline, with its vicious partisanship, gridlock, and the most shortsighted thinking imaginable finally began to have consequences. In August, Standard & Poor's, an agency that once upon a time gave AAA ratings to CDOs backed by subprime mortgages, suddenly decided that the United States government might not be able to pay off its debt-America might not be able to pay off its debt to China. If you had predicted that outcome even

five years ago, you would have been either ignored or committed. Not that these grand geopolitical shifts were even the most surprising or unnerving moments of the year's all-pervasive order-crumbling. Small everyday assumptions, it turned out, could no longer be taken for granted, Canadians rioted. The pope tweeted. After three horrific suicides over the summer, we learned that hockey goons are not tough guys: they live in a state of extreme psychological vulnerability. In

PRULMITCHELL

Sentember, when scientists announced that they believed they might have discovered a particle that travels faster than the speed of light. the news could not have come at a more perfect moment. You know that little fact we've been hanging our entire conception of physics on? Oons, As Alvaro De Rújula of CERN, the European physics center, put it, "If it is true, then we truly haven't understood anything about anything," Which may as well be the motto for the year, I mean, what's next? Women don't actually find George Clooney attractive? What they really want is Jason Alexander during his fat period?

Even the scandals this year had a chaotic flavor to them, a brutal randomness at their core Schwarzenegger DSK Sheen-their lusts are different from those of Clinton or Eliot Spitzer, nastier, less considered. Whatever other faults Spitzer possessed—and they were enough to inspire a hit television show—the man had taste. He was capable, even in career suicide, of making aesthetic distinctions. He bought himself a ten. Arnie just grabbed the maid. Sheen may be the icon of the year for the simple fact that he has channeled his barbarism into a somewhat workable version of how to fall apart while riding high. (Or is it the other way around?) He represents a new and diminished ideal for a world of wild disorder: Surf the tsunami What does it all amount to? Remember when everybody made fun

of Donald Rumsfeld, that prophet of the unknown unknown, for saving "stuff happens"? Now it seems like the smartest thing any-

Engiste

one's said in the past decade. "The only wisdom we can hope to acquire / Is the wisdom of humility." T. S. Éliot wrote, "Humility is endless." The most encouraging aspect of this year of chaos is that the human race didn't come off all that badly among all the unprecedented ruination. During the disasters themselves, the selfishness of quotidian life, the ordinary beggar-my-neighbor zero-sum game of our everyday struggles momentarily evaporated. After the nuclear meltdown in Fukushima hundreds of elderly Japanese engineers volunteered to clean up the mess, so that the cancers that would inevitably result from exposure to nuclear waste wouldn't kill younger people. The tornado that swent through Jonlin Missouri in May left in its wake stories of heroism and selfless generosity. The same during Irene, the

same during the earthquake, Our best stuff comes out during the shitstorm. Society, like marriage, works best in a crisis. These reprieves should be cherished because unfortunately the

next test won't be far in the future. The prospective catastrophes of 2011 were somehow even more terrifying than the ones that actually happened, Hurricane Irene graciously demurred from destroying New York, but she raised the quite real possibility that Wall Street will someday look like New Orleans. The economy, Europe the Middle East, the weather, everything, everything is churning, roiling with more turmoil. Increased volatility is the only safe bet. That's the only future we know is coming. 84
